

THOMAS R. FUNK (Hg.)

Thrombus-Bildung und
die Anwendung von
futomat[®]-Wasser

deutsch/englisch

Content

0. Summary	37
1. Introduction to red blood cells	38
2. Red blood cell membrane and membrane asymmetry	39
3. Biological role of Ca ²⁺ in human red blood cells	40
4. PS exposure	41
5. Adhesion of phosphatidylserine exposed red blood cells	43
6. Concepts about the role of red blood cells in thrombus formation	43
7. Experimental evidence that red blood cells play an active role in thrombus formation	45
8. Effect of futomat® water on physiological parameters of red blood cells	46
8.1 Methods	47
8.2 Results	50
9. Conclusion	55
10. References	58
